Instructions of use

Step up at either side with one foot, then with the other foot. Movements will happen naturally. If you want more movement, shift your weight from side to side, which will also happen naturally, partly by your own intuition. Further instructions are available at the Steppie web site; see the video.

Unintended effect, safety and complaints

Any unintended impact caused by using the Steppie should be reported immediately to the dealer of the Steppie and passed on to the company, Steppie ApS, Denmark.

Furthermore, all kinds of safety issues or complaints should be passed on to Steppie as soon as possible.
